4. CONCEPTS, SOURCES AND METHODS

Employment statistics provide data on the average number of persons in formal employment, and average monthly earnings (SR gross). These are compiled quarterly by industry (ISIC Rev.4) and sector (Private, Parastatal, and Government).

Employment and earnings data for Government and Parastatal sectors are published disaggregated by gender (males & females) and by local versus expatriate.

The data for the compilation of formal employment and earnings statistics is obtained mainly from administrative sources. Government and Parastatal data are obtained respectively from the payroll register at the Seychelles Treasury Department and the Department of Information, Communication and Technology (DICT), as well as directly from commercial public sector organizations. Data for the private sector data is obtained from the Seychelles Revenue Commission (SRC).

It is to be noted that the formal employment and earnings figures do not contain those of the Seychelles People's Defence Forces (SPDF) as the data for this organization is not provided to the NBS for security reasons.

The formal employment and earnings statistics is compiled quarterly based on monthly data collection. The data is compiled in an excel spreadsheet using excel pivot tables.

In the process of analysis, less than 2% of the 2015 Q1 data on employment and earnings for the private sector has been amended and imputed.

Any changes in employment and earnings data as a result of updated source data that occur after the data analysis will be reflected in the following quarterly bulletin.

5. NEXT RELEASE

The next issue of the formal employment and earnings statistics bulletin will be released on Friday 28th August 2015.
