"Your stepping-stone for informed decisions"

1. INTRODUCTION

The Producer Price Index for Manufacturing (PPIM) is compiled by the National Bureau of Statistics. It presents a monthly measure of inflation from the perspective of the producer in the manufacturing industry. Concepts, sources and methods are given in Part 4.

Figures for January 2013 to February 2016, with January 2013 as the reference period are presented in this bulletin. Table 1 presents the monthly PPIM index numbers and percentage changes for the total PPIM.

Charts 1 and 2 present index numbers and month on month percentage change respectively. Chart 1 now includes a seasonally adjusted series. Seasonal adjustment removes any seasonal effects from the original time series data.

2. RESULTS AND HIGHLIGHTS

The total PPIM Index in February stood at 76.1 compared to 74.6 in January 2016. This represents an increase of 2.0%.

Most sub categories remained unchanged over the month. However, an increase occurred in Processing and preserving of fish, crustaceans and molluscs (2.7%).

The year on year movement from February 2015 to February 2016 represents a decrease of 18.5%. The largest fall over this period occurred in the category Electric power generation, transmission and distribution(-61.8%).

Table 2: Producer Price Index by Manufacturing Sector

Notes:

- (1) Year on year % change is calculated as the percentage change from the same month of the previous year.
- (2) Quarterly index is calculated as the average of the monthly indexes for that quarter.
- (3) Reference base is 2013 = 100.

4. NEXT RELEASE

The next issue of the PPI will be released on Friday 29th April 2016 and will contain data for March 2016.
